GARDEN AND FACADE LUMINAIRES

Where we like to spend our summer holidays evenings?

Of course, in the gardens or on the terraces! In summer, it is worth ensuring yourself a pleasant one outdoor recreation. During the day we are pampered by the sun, and the evenings will make our company pleasant friends, good food and music. In home gardens and on balconies we can create an amazing mood thanks to proper lighting.

MEDIO

Geometric shapes are the hallmark of modern design that has been the most frequently chosen style by architects for many seasons. MEDIO series of fittings is in line with modern arrangements of gardens and building facades. Any light source with an E27 thread and power not exceeding 15 W can be used as a light source. However, ST64 filament light sources from the Vintage and Smoked series look the best.

Thanks to the use of the PIR motion sensor, paths in the garden will be illuminated only when necessary, thus saving electricity consumption. The PIR (infrared) motion sensor detects human body heat, and if it is within the detection range of the sensor, the device will work.

TORO

Toro garden fixture is a well-thought-out design in which design goes hand in hand with functional comfort. The refined, simple visual character does not impose itself in terms of arrangement, but neatly blends into the style of garden it illuminates. Depending on the model chosen, it is perfect for illuminating a sidewalk, path, duct, terrace or house facade or front fence.

Toro garden fixture has been created in three different variants, with the use of which you can successfully design comprehensive garden lighting in any place. A wall light point - a sconce will be suitable for the facade of the building and it will illuminate not only the address board, but also the mailbox, entrance to the house or exit to the terrace. The lower standing Toro garden lamp complements the higher one, giving great arrangement freedom to adapt the lighting to individual needs.

CORTA

CORTA series of fittings is in line with modern arrangements of gardens and building facades. A milky cover made of durable polycarbonate effectively softens and disperses the light. Any light source with an E27 thread and power not exceeding 25 W can be used as a light source. Thanks to this, each user can adjust the intensity and colour temperature of the light to his own arrangement.

Milan will be perfect for arranging modern gardens. It will provide a pleasant atmosphere in the evening, and it will be an elegant decoration in the daytime.

LUSTINO

An original garden lamp in a triangular shape that will add attractiveness to our surroundings. It is available in the facade and above-ground variants. The adjustable head makes it possible to choose the light angle, which gives us various possibilities of illuminating a lawn. Its universal anthracite colour will match any colour of a building.

For all those who need an additional source of electricity in the garden, we have prepared a pole with shuko socket (IP44), to which you can connect devices with a maximum of 2500 W.

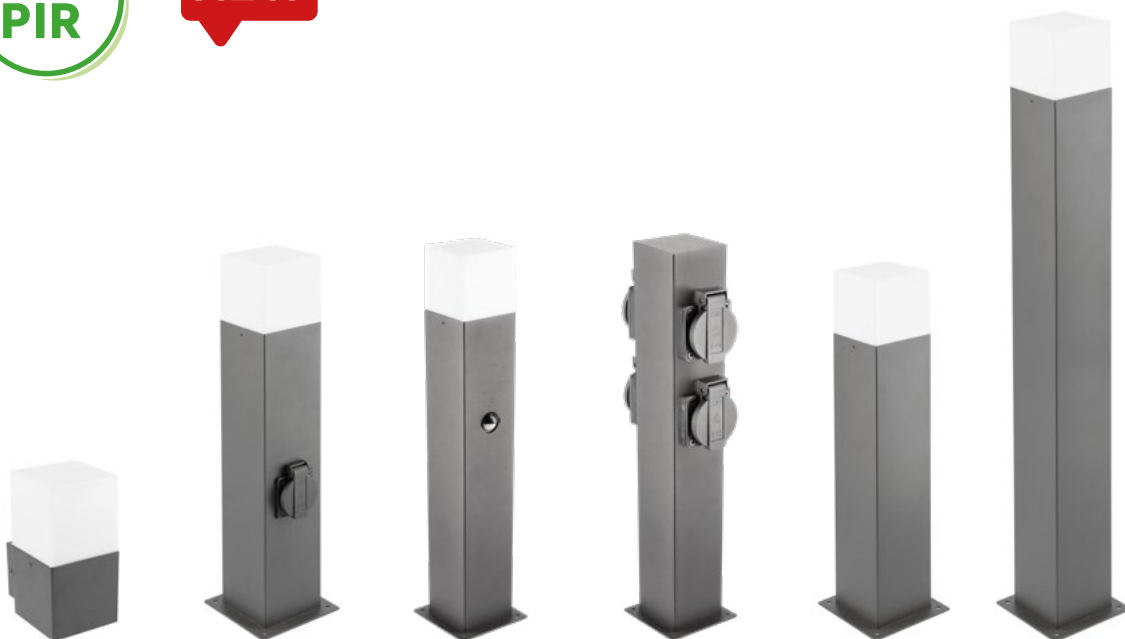

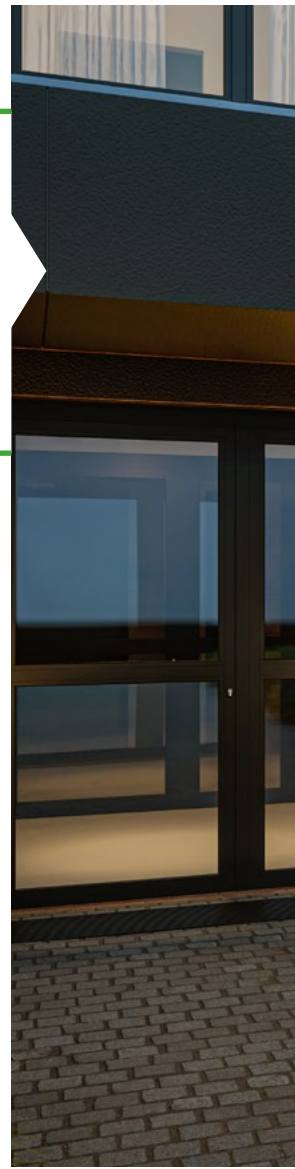

LARGO

Geometric forms are a hallmark of modern design that has been the most frequently chosen style by architects for many seasons. LARGO fixtures perfectly match modern arrangements of gardens and building facades. A milky cover made of polycarbonate effectively softens and disperses the light. Any light source with an E27 thread and power not exceeding 25 W can be used as a light source. Thanks to this, each user can adjust the intensity and colour temperature of the light to his own preferences.

BALEO

For modern buildings, cylindrical outdoor lamps will be a good choice, which will slightly soften the harsh minimalist facade.

The Baleo family of façade sconces consists of one-way and two-way variants. Each of them has a standard and mini version. The mini fixtures use GU10 light sources, while the standard fixtures use E27 bulbs.

Buildings where the facade is designed with attention to simplicity and functionality, with minimal use of ornaments and accessories are places where sconces with geometric shapes should be used. Facade wall sconces characterized by modern design are an elegant solution for single-family houses and modern housing estates.

Looking for durable solutions, it is worth betting on lamps from the Silva family. Corrosion-resistant aluminum and tempered glass were used in their production.

Ventana can be hung on a decorative chain or mounted on a building wall.

RIVEN

Riven ceiling fitting is lighting that can be used indoors, but also as outdoor lighting - it can operate in the range from -20 to +35 degrees Celsius. The minimalist nature of light points is a perfect complement to modernity, minimalism or Scandinavian style. This visual simplicity makes it possible to match Riven ceiling lamps to many different arrangements, in which they gracefully blend into the character of the interior, adding a touch of elegance.

Lento ceiling fitting is a modern line of lighting for stylish and elegant interiors. Its refined character fantastically complements modern and minimalist arrangements, it also fits into interiors in a loft and uncomplicated Scandinavian style. All its charm is hidden in the simple form of this ceiling fitting, and it is a decoration in a balanced, elegant style. A polymer cover in a milky finish is also an interesting complement. Thanks to it, despite the bright lighting of the space, Lento ceiling fitting protects the eyes from being dazzled by light.

AE-GIR10-10	max. 10 x 10 W		5902801337017

By combining several garlands (maximum 15), we get an amazing lighting effect and we give the surroundings a magic character.

DIEGO

This is one of the most popular solutions chosen by our customers, which give full freedom in arranging garden lighting. We got such flexibility by using in-ground spike mounting, not screwed mounting. The power cord is very easy to hide under grass, bark or grit.

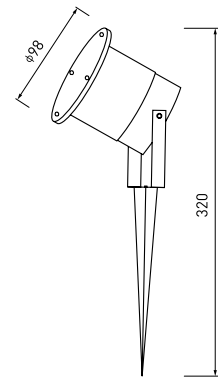

The black variant makes it possible to discreetly hide the fixture among the greenery.

OS-MARMO38-00		o380 x 350	5902801224683

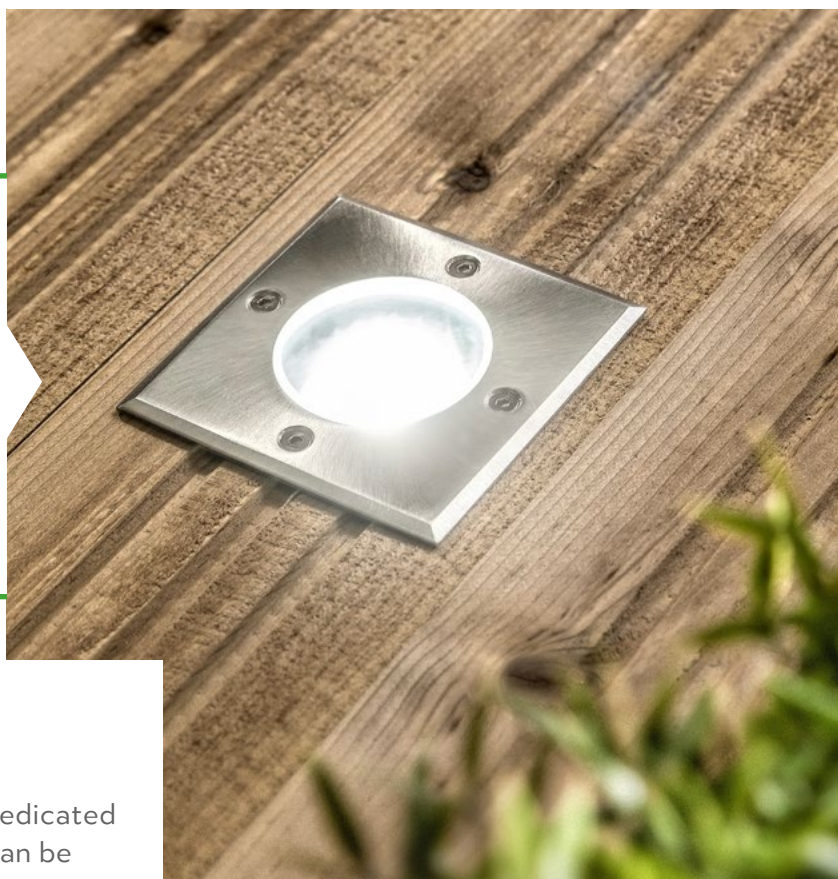

Marmo fixtures should preferably be placed on lawns where they provide soft, pleasant light.

ALFA / ALFA MINI

In-ground fixtures are almost a standard in illuminating garden and park passageways as well as driveways and terraces. You can be sure that the final result will be stunning when choosing ALFA fixtures. The fixtures with a larger and smaller diameter, in two shapes, round and square can be used in arrangements.

After putting dedicated covers, ALFA can be used as a driveway light that is not afraid of any car.

Inrun lamps are a category of products created to complement gardens, paths, driveways and the surroundings of houses. It is thanks to them, while maintaining full comfort of use, that we can enjoy cozy lighting, increasing safety and at the same time taking care of a refined visual style. Overrun lighting comes in various variants, which can be easily selected to individual needs.

The light source can be any bulb with a GU10 cap. It is important that its power does not exceed 50 W. The movable head, hidden under the lid of hardened glass, allows you to direct the light in the desired direction.
